

BlackBerry

Work on the go

In today's digital networked economy people find it necessary to be constantly connected to their workplace no matter where they are. BlackBerry® is a wireless solution that supports push email, business applications access and offers mobile telephony with text messaging, web browsing and other wireless information services.

This leading wireless communications solution gives mobile employees the same secure, convenient access to information and communication as office based personnel. It permits greater connection to customers, colleagues and corporate data, converting downtime into productive time while satisfying the security and other requirements of corporate IT departments.

BlackBerry® delivers everything needed to make wireless really deliver –from handholds and innovative software to wireless network services.

BlackBerry® Internet Solution™ :

It's never been easier to get email, attachment viewing, web browsing and instant messaging on the go!

BlackBerry® Internet Service is the out-of-the-box service that comes with every BlackBerry® Smartphone that is activated with a data plan*. You can be up and running in just a few steps, regardless of email account type — and without IT support. It's the easiest, most affordable way for individuals or small businesses to start using BlackBerry Smartphones.

BlackBerry push technology lets you receive your email effortlessly because messages are automatically pushed to your device.

With BlackBerry you can:

- Access up to 10 work and personal email accounts, plus an optional, new BlackBerry email address that comes with your BlackBerry Smartphone
- Browse websites and instant message on your BlackBerry Smartphone just as you would on your desktop browser

If you're looking to gain a competitive edge, increase your productivity and save time, the BlackBerry® Internet Solution™ is the wireless connectivity solution to help keep you in-the-loop when it really matters.

BlackBerry® Enterprise Solution™ :

The BlackBerry® Enterprise Solution™ provides end-to-end wireless connectivity for securely extending existing business information to mobile professionals on the move. It provides end users with a secure wireless access to email, enterprise data, phone calls, the Internet, SMS and organiser applications. BlackBerry® Enterprise Solution™ is highly scalable, whether you have 5 users or 100,000 users, with centralised management for IT departments and Enterprise-grade security features.

Features and Benefits

- **Email:** BlackBerry automatically delivers email from your email server to your handheld using Push technology. You can access your corporate directory and manage important emails wherever you are. You can also view attachments in popular formats such as Microsoft®Word, Microsoft®Excel, Microsoft®Powerpoint, Adobe®PDF, Corel®Wordperfect®a8, HTML, ASCII, JPG and TIFF.
- **Corporate data:** With BlackBerry®you can also access critical corporate data such as customer details, pricing, order information and inventory updates.
- **Web access:** The BlackBerry's®inbuilt browser allows instant wireless access to the Internet and the company's intranet while on the move – no need to connect or dial up.
- **Mobile phone:** The BlackBerry®handheld is also a powerful mobile phone that provides all the expected phone services such as SMS, MMS, Bluetooth®, Quad Band, GPRS/EDGE, 3G/HSDPA Speaker

phone, Full Qwerty keyboard, etc. It also supports the following features: Call Waiting, Call Forwarding, Conference Calling and Roaming.

- **Organiser:** Blackberry® gives you mobile access to your business address book and task list through desktop synchronization and wirelessly to your business calendar.
- **Extras:** Built on a powerful Java™ platform, Blackberry® can be extended by adding applications provided by your own developers or by the extensive community of Java™ Developers.
